Summary

- 11 years of experience as a Full Stack Developer specializing in **ReactJS, NodeJS, MongoDB, SQL NextJS, JavaScript, TypeScript, WebRTC** and related technologies.
- Led multiple projects with diverse team sizes, overseeing architecture, design, and deployment.
- Expertise in **system design, codebase setup, and project optimization**.
- Experienced in **SCRUM methodology** and Agile development cycles.
- Proficient in **mentoring, technical troubleshooting, and client interaction**
- Hands-on experience with **Agentic AI and RAG systems**, building intelligent agents for workflow automation and context-aware decision-making.

Work Experience

Engineering Lead – Publicis Sapient, Noida

Feb 2025 – Present

Tech Stack: ReactJS, NodeJS, SQL, MonoRepo, Microservices, JavaScript, TypeScript

Project Title: Lloyds Banking Group – Digital Banking & Customer Experience Platform

Project Description:

This project focused on building and enhancing digital banking solutions for Lloyds Banking Group, enabling customers to seamlessly manage accounts, transactions, and financial services through secure and scalable web applications.

Key Responsibilities:

- Developed Low-Level Designs (LLD) and contributed to the architecture of multiple frontend and backend modules.
- Built scalable and high-performance web applications using the MERN stack (MongoDB, Express, React, Node.js).
- Designed and developed reusable UI components to ensure consistency and faster development across modules.
- Implemented RESTful APIs and integrated them with frontend applications for seamless data flow.
- Developed an integrated identity verification feature using Mitek Systems, enabling users to authenticate via selfie and government-issued IDs (passport/driving license).
- Handled image capture, validation, and secure transmission of user data for real-time verification.
- Ensured compliance with banking security standards and data protection policies during identity verification workflows.
- Optimized application performance by implementing lazy loading, code splitting, and efficient state management.
- Collaborated with cross-functional teams including backend, QA, and product teams to deliver high-quality features.
- Participated in code reviews, testing, and deployment processes to maintain code quality and reliability.
- Engaged with stakeholders to understand business requirements and translated them into scalable technical solutions.

Tech Stack: ReactJS, NodeJS, SQL, NextJS, WebRTC, JavaScript, TypeScript

Project Title: Walmart - Seasonal Merchandising & Order Management System

Project Description: This project focused on managing and planning seasonal inventory for Walmart, enabling merchants to efficiently place orders with suppliers.

Key Responsibilities:

- Developed **Low-Level Designs (LLD)** and designed the **architecture** for multiple modules.
- Implemented a **Micro Frontend architecture** to enhance scalability across applications.
- Built **reusable UI components** to standardize development across modules.
- Led a team of **10+ engineers**, ensuring smooth execution and delivery.
- Engaged with clients to **gather requirements** and provided **solution designs** tailored to business needs.

Project Title: Lennar - Real Estate Operations Management Platform

Project Description:

This project aimed to streamline real estate operations by integrating multiple modules covering the entire property lifecycle—from buying to selling.

Key Responsibilities:

- Designed and developed **reusable UI components** and **user interface screens** for the platform.
- Integrated **AAA accessibility features** to improve user experience and compliance.
- Set up the **GraphQL architecture** for efficient data fetching and API management.
- Implemented **code optimization** and **quality checks** using **SonarQube**.
- Processed and stored **Excel/CSV file data** into the database for analytics and reporting.
- Developed and maintained **cron jobs** using **Azure Timer Trigger and Event Trigger**.

Project Title: EYVIA - Audit & Risk Management Platform

Project Description: EYVIA is an advanced **audit and risk management platform** designed to streamline the auditing process and risk assessments.

Key Responsibilities:

- Developed **reusable components** for different modules to enhance efficiency.
- Designed the **application architecture**, ensuring scalability and maintainability.
- Built and integrated a **multilingual feature** supporting **22+ languages** for global reach.
- Implemented **speech-to-text** functionality to enhance accessibility and audit efficiency.
- Wrote and maintained **unit test cases** for both backend and frontend to ensure reliability.
- Developed and optimized **REST APIs using Node.js** for seamless data processing and communication.

Project Title: Economist - Digital Newspaper Platform

Project Description: The Economist project is a **newspaper website** designed to provide users with seamless access to news and insights. It includes various sections such as "**Issues & Insights**," "**Events**," "**Tools**," "**About**," and "**Newsletter**."

Key Responsibilities:

- Designed the **application architecture** using **Next.js, Typescript** for optimal performance.
- Developed **reusable UI components** to ensure consistency across the platform.
- Integrated **AWS APIs for image optimization**, enhancing website load time.
- Created **separate artifacts for UI components** to improve modularity and maintainability.
- Ensured **AAA accessibility standards**, making the website inclusive for all users.
- Maintained **code quality standards** using **SonarQube** to enhance code reliability.

Software Engineer – TalkValley LLC, Chandigarh

April 2017 – March 2021

Tech Stack: React, NodeJS, MongoDB, Redux, Express, AWS, WebRTC, SOCKET

Project Title: Mentorstudents - Video Conferencing & Alumni Interview Platform

Project Description: Mentorstudents is a video conferencing platform for interviews between university alumni in high-level positions and hosts. It focuses on real-time communication, recording, and seamless user experience.

Key Responsibilities:

- Designed the **end-to-end application architecture**, covering both frontend and backend.
- Developed **various reusable components** for enhanced maintainability.
- Built a **video conferencing tool using the WebRTC protocol** for real-time communication.
- Implemented **video processing, recording logic, and dynamic server creation at runtime**.
- Developed a **real-time chat feature** using **Socket.IO**.
- Wrote and maintained **unit test cases** to ensure system reliability.
- Integrated a **TURN server** to resolve firewall-related connectivity issues

Associate IT Developer – Daffodil Software Pvt Ltd, Gurugram

January 2015 – March 2017

Tech Stack: ReactJS, NodeJS, MongoDB, Redux, Express

Project Title: Applane - CMS for Schools & Organizations

Project Description: Applane is a **comprehensive CMS platform** designed to digitize various modules for **schools and organizations**. The platform provides a **web application** where teachers, students, parents, and employees can manage their routine tasks. Key functionalities include **attendance tracking, exam report generation, fee management, and administrative operations**.

Key Responsibilities:

- Developed **reusable components** to improve code efficiency and maintainability.
- Implemented **business logic** for various modules to manage and display reports and data.
- Designed the **database architecture** for different features to ensure scalability and performance.
- Created **services for generating PDFs, Excel reports, and web reports**.
- Integrated **Stripe payment gateway** to enable secure transactions.
- Implemented a **real-time chat feature using Socket.IO** for enhanced communication

Education

Master of Computer Applications (MCA) – Kurukshetra University, Kurukshetra

June 2012 – December 2014

Bachelor of Computer Applications (BCA) – Kurukshetra University, Kurukshetra

May 2009 – March 2012

Tech Skills

- **Languages & Frameworks:** ReactJS, NextJS, JavaScript, TypeScript, Redux, WebRTC, NodeJS, ExpressJS, Azure, AWS, React-Native
- **Databases:** MongoDB, PostgreSQL (basic familiarity)
- **Tools & Platforms:** Webpack, JIRA, GitHub, AWS, Docker, Kubernetes, Visual Studio Code
- **Testing:** Jest, Enzyme, Mocha

Accomplishments

- Contributed to a project nominated for a **Webby Award** for Best Practices (Economist)).
- **Awarded** for excellence at **Infosys**.
- **Certified** in ReactJS, MongoDB, Azure fundamentals, MongoDB
- Successfully delivered **20+ projects** in **healthcare, education, and learning platforms**.
- Promoted to **Senior Engineer** within **2 years**.
- **Managed & led a team of 10 developers**.
